

The Larkfleet Group of Companies

The entrepreneurial spirit, energy and commitment of Chairman Karl Hick, has led to the establishment of a unique group of businesses which all have a distinctive focus on sustainability.

Our corporate 'vision' is to produce high quality sustainable developments using innovative technology and construction methods, delivered to exceed customers' expectations.

Although our focus on sustainable housebuilding remains core to our business – and our roots remain firmly in the Lincolnshire town of Bourne where we have our headquarters. We are seeking to develop more energy-efficient and sustainable homes and introduce new renewable generation technologies.

Group activities

We strive to employ local people and place contracts with local suppliers. Our success means we are able to support local economies with employment opportunities, support local eco-systems with our sustainable construction and wildlife protection practices and support the local environment with our low carbon building methods.

We are a major supporter of training initiatives, not just through our own apprenticeship and graduate recruitment programmes but through support for local colleges and sponsorship of the Greater Peterborough University Technical College.

Our success also enables us to support local communities through activities such as working with local schools and charities and sponsoring business awards to celebrate the achievements of local companies.

We invest heavily in Research and Development of innovative new building designs, materials and construction methods.

All of the businesses within the group share a common philosophy of embracing sustainability in all its aspects – environmental, social and economic.

Innovation and sustainability has always been at the heart of The Larkfleet Group of Companies, Lincolnshire's award-winning housebuilding and development business.
